OLD PUBLIC OFFICES, BANGALORE.

Press Note

COMPREHENSIVE SCHEME OF WATER-SUPPLY TO ALL MUNICIPAL TOWNS.

Expedited Execution Proposed.

Representations have been made from time to time to Government by the Municipal Councils in the State that in view of their limited resources they are unable to take up improvement works without governmental aid by way of grants or loans. This question has been considered in all its aspects by Government. With a view to having a clear idea of the various improvement works which the municipalities wanted to undertake, Government requested them to indicate the expenditure which they had to incur for (1) water-supply, (2) drainage, and (3) other improvement works. A consolidated statement of the expenditure on behalf of each municipality in the State was prepared on the basis of the information obtained from the several municipal councils. The total amount that would be required for the above works in the State is more than

rupess 5 crores and 20 lakhs. Government have carefully examined all these schemes and have come to the conclusion that topmost priority should be given to the execution of water-supply schemes. The matter was placed before the last session of the Legislature also and a supplemental grant of Rs. 50 lakhs was voted for the above purpose. This allotment is now proposed to be distributed during this year amongst several municipal councils as a loan. The basis for the distribution would be that all estimates amounting to Rs. 50,000 and below would be sanctioned in full, estimates exceeding Rs. 50,000 but below Rs. one lakh would be sanctioned half the estimate and those exceeding one lakh would be sanctioned one-fourth of the estimated cost. This loan will be distributed to all the municipal councils on condition that the loan is repayable within a maximum period of 15 years, that interest at 5 per cent per annum will be charged and that provision will be made in the budgets of the municipalities for the repayment of loans which will be a first charge on the municipalities.

This is perhaps the first instance in the country where a State has undertaken such a comprehensive and all-out scheme for the improvement of water-supply in all the municipal areas in the State. With the rapid expansion of industry and the increase in population, the need for such a scheme has been evry acutely felt and although in the past several efforts at tackling this problem were undertaken, they were rather haphazard in manner. It is now hoped that this comprehensive scheme of assistance to all the municipalities will go a long way in solving the problem of water-supply in all the towns.

Government are very anxious to see that this scheme is put into execution immediately and completed within a period of three years. The balance of the loan in respect of each municipality will be sanctioned in the coming years as and when work in that individual area progresses. The Accountant-General has been requested to permit municipal councils to draw the loan amount now sanctioned during the course of the year 1952-53, provided the councils concerned agree by a specific resolution to abide by the terms of the loan. The Chief Engineer of Mysore has been requested to obtain technical sanction to the estimates for the water-supply schemes within one month. After technical sanction is accorded, tenders will be called for within 15 days from the date of sanction, and all the works will be started during the first week of February 1953. All the concerned officers have been told that there should be no delay in the execution of the scheme. Deputy Commissioners of districts have been requested to see that the loans are drawn by the municipalities and placed at the disposal of the Public Works Department immediately and to take such action as is necessary for completing the work with the maximum amount of expeditiousness. The Commissioner for Local Self-Government has been requested to watch the progress of works done and to intimate the Government by the 10th of every month the progress achieved in the previous month.

The whole allotment of Rs. 50 lakhs has been distributed as per the statement appended to this note. It is hoped that the municipalities will now take advantage of the facility offered to them and speedily push through their water-supply improvement schemes.

Press Note.

In pursuance of the Government Order No. T. 2384-94—R.T. 28-52-6, dated 21st October 1952, the Mysore Government Road Transport Department has made necessary arrangements to monopolise the *six routes* noted below.* Government services have been running in all these routes already along with private services. Under the new set up, Government services will be concentrated on these routes, frequency of the services depending on the need of the travelling public. Wherever it is deemed not necessary, services have been withdrawn (from non-monopoly routes) or curtailed keeping in view the adequacy of existing road passenger transport services. To facilitate the through passengers some services will run beyond the Monopoly routes.

- (1) Bangalore—Kolar Gold Fields.
- (2) Bangalore—Devanahalli.
- (3) Bangalore—Doddballapur.
- (4) Bangalore—Tumkur via Nelamangala.
- (5) Bangalore—Bellur via Nelamangala and Kunigal.
- (6) Bangalore—Gundlupet via Ramanagaram, Maddur, Mysore and Nanjangud.

At present, 93 buses are operating covering a mileage of 11,200 per day.

Under the new set up 95 buses will be operated with effect from 1st January 1953 covering a route mileage of 332 on the monopolised routes and 746 on the non-monopolised routes. The total mileage per day will be 11,174.

The buses have been distributed as under:

The Bangalore—Mysore route was almost monopolised and therefore the 21 buses have been retained. On the Mysore—Gundlupet Section 9 buses will run out of which 6 give direct connection in place of private services to be eliminated to Ooty and Calicut and 3 for the intermediate passengers. On the Mysore—Nanjangud Section 3 buses will run 25 shuttle services in place of private services stopped. In all 20 buses halt in Mysore daily. Eleven buses were already running on the Bangalore—Bellur Section. Beyond Bellur, two to Hassan and one to Chickmagalur and two to Mysore Services have been detained. Sixteen buses will run on this section. Out of the 5 extra

buses 3 are meant for the through passengers and two for intermediate passengers. On the Bangalore—Tumkur Section 21 buses will run as against 19, the 2 extra being in place of two private services stopped, 2 more buses have been added making 8 additional shuttle service in Bangalore—Doddballapur Section. Similarly, on Bangalore—Devanahalli Section, 3 buses have been added to make 8 shuttle services.

On the Mysore—Gundlupet Section arrangements have made with private services connecting Ooty and Calicut to give preference to through passengers on either side.

Booking Offices are proposed to be opened at Traffic Centres like Kolar, Tumkur, Bellur, Chitaldrug and Gundlupet in addition to the existing one at Mysore.

Action is being taken to provide shelters to the passengers where passengers have to be transhipped and have to wait for buses.

Arrangements have also been made to carry mails on the monopoly routes in consultation with the Senior Superintendent of Post Offices.

Monopolisation is the essence of Nationalisation. Implementing monopoly on 6 routes is the first experiment. A tentative list of routes and timings have been notified in MRT/Adm/6087—52-53, dated 25—26th December 1952. The situation will be carefully studied and whenever there is need for additional trips they will be undertaken and unnecessary trips will be cancelled or curtailed. This type of arrangement will give facilities to the travelling public. There should not be much difficulty in handling the traffic as the Government Services have all along been running in these six routes. Twenty-five buses have been kept as spares to meet any emergency.

The enlightened public of Mysore are requested to co-operate with Government in the Scheme and make it a success.

(P.N. No. 169—29-12-1952).
